

Earth-friendly pet products

**KEEP IT NATURAL,  
PICK FROM THE FIELD!**

877 676-7689  
[www.fromthefieldpet.com](http://www.fromthefieldpet.com)

“Protecting the environment is now a priority for most pet customers. They may not ask for **all natural** products, but if a choice is presented to them between a natural pet toy and a plastic/foam one at equal price, they go for the **earth-friendly** one.

That is why we created a full line of **HEMP** cat and dog toys, along with a wide choice of **all natural, fresh and potent** catnip products.

We believe in creating products that are bio-degradable, pet safe, pet friendly and pet smart.

Our All Natural Catnip is grown in Washington State, USA. The **Hemp Fabric** and **Hemp rope** we use to make our toys comes from Romania and China, since the US government still ban growing hemp plants on US soil (quite regrettably).

You can be confident that when you buy **From The Field All Natural products**, you are making a good investment for your business, your customers, their pets, and the planet.

*Environmentally yours,*  
**Pascal Bedard & Aimee Ross**

## WHY USE HEMP? \*

Hemp is on everybody's lips when we talk about earth-friendly, bio-degradable, all natural products (and food).

To quote Pet Product News magazine article on hemp (February 09)

"Holistic Hemp: For the pet market, this product in many forms surpasses its eco-friendly image" (See a copy of the article on our web site: [www.fromthefieldpet.com](http://www.fromthefieldpet.com))

### Benefit for Pets

First, the **hemp** plant is grown **without pesticides or weed killer**, compared to cotton that needs a lot of it. In turn, that eliminates pet being exposed to toxins, since toys often end up in their mouth. This is also valid for young children and the whole family.

Hemp is naturally **antimicrobial, mold and mildew resistant, and hypoallergenic**. The strength of hemp is remarkable: **4 times stronger** than cotton.

If a pet swallows bits of hemp fabric or hemp rope, it is digested the same way as grass or hay. Plastic or foam can be very harmful if ingested by a pet since it is indigestible.

### Benefit for the environment

There is more that 2000 uses know for the Hemp plant. From home building material to food, to paper (instead of trees) to auto part and cellulose based plastics, bio-fuel, etc.

Hemp provides hope against the deforestation and raging pollution that we are now experiencing.

### Informational Facts

Growing Hemp crops was banned in the US in 1937. Canada has allowed hemp growing to begin in 1999. Due to the lack of hemp transformation technology, Canada now produces only hemp seeds, hemp oil, raw hemp fiber and hemp core bedding.

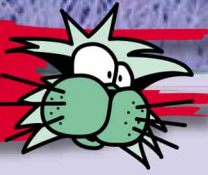

The Hemp plant is a cousin of the Marijuana Plant. The major difference is that the THC (psychoactive substance) content in hemp is always below 0.03%. It is virtually impossible to get "high" by smoking hemp. There is more alcohol in cough syrup than THC in Hemp.

More information available on our web site: [www.fromthefieldpet.com](http://www.fromthefieldpet.com)

**\* (We recommend that you have your staff read this information about hemp in order to educate them. In doing so, they will be in a better position to sell/answer questions about hemp pet products.)**

Our new Ringo Rings are interactive dog toys made with all natural, raw hemp rope and vegetable dyed durable hemp fabric. Offered in medium and large.

Fully Biodegradable, non-toxic.

Hemp is naturally antimicrobial, mold and mildew resistant, and hypoallergenic. Hemp is a highly renewable resource that grows without pesticides or weed killers. It doesn't require heavy bleaching like cotton. Hemp is similar to grass although we do not recommend leaving your dog unattended with our toy.
